SHARING YOUR INFORMATION

From the 12th June 2017 there will be the ability to access and share your information between the GP practices as well as other health and social care professionals in the community when they are providing you with clinical care.

- Information sharing is sometimes essential to provide high quality care**
- Should sharing be needed it will only be the minimum necessary, on a need to know basis, for a specific purpose**
- If you prefer for your information not to be shared in this way, you can choose to opt out by filling in the opt-out form available at your GP Practice**

This is underpinned by the new Caldicott principle that the duty to share personal confidential data can be as important as the duty to respect patient confidentiality.
